

Configuration File Editor

Config Edit

THIS WIKI HAS BEEN UPDATED FOR VERSION 13 OF YOUR PBX GUI

What is the Configuration File Editor module used for?

Configuration file editor gives you the ability to edit custom FreePBX files in the browser that you would normally have to edit through the CLI.

How do I get to the Configuration File Editor module?

- Log into the PBX GUI
- In the top menu go to **Admin**
- In the drop-down menu go to **Config Edit**

Usage

See the [Configuration File Editor User Guide](#)
