

OSS End Point Manager

Overview

OSS PBX End Point Manager is the community supported PBX Endpoint Manager for FreePBX.

The front end WebUI is hosted at: <https://github.com/FreePBX/endpointman>

The back end configurator is hosted at: <https://github.com/provisioner/Provisioner>

Pull Requests can be made to either of these and are encouraged.

This is not the same as the commercial EPM and it is **NOT** supported by FreePBX or Sangoma Technologies inc. If you are looking for a Commercially supported endpoint manager please look into the Commercial Endpoint Manager by Sangoma Technologies inc

Usage

See the [Tutorial Video](#)

Contributing

We welcome community contributions to the WIKI for documentation. Please message [James Finstrom](#) To contribute information for the wiki.

For code and bug contributions you may fork the github repos mentioned above and submit pull requests back to the projects.
