

Broadcast XactDialer

THIS WIKI HAS BEEN UPDATED FOR VERSION 13 OF YOUR PBX GUI

Commercial Module

Does your company do outbound message broadcast dialing? Would you like to automate the process? If so, XactDialer (also known as Broadcast) is for you. Create a broadcast campaign and choose where to route your calls. XactDialer even gives you the option to route calls to different destinations based on whether a person or voicemail answers. You can receive reports on your campaign daily or after the campaign completes.

Stop dialing each individual number, and start using XactDialer to automate your outbound dialing. Contact a sales representative today and see how you can benefit from XactDialer!

Please note, this is not a predictive dialer and is designed to broadcast messages to your call list.
