

CDR Reports Module

What is the CDR Reports Module used for?

The CDR Reports Module allows you to view a report showing the telephone calls made from and received to your system.

You can choose to view a complete history of calls, or to search by date, date range, number called, caller ID, etc.

The CDR Reports Module includes tool tips that help to explain what the options means.

The CDR Reports module requires that your CDR records be stored in the database and does not read the data from a flat file at this time.

How is the CDR Reports Module related to the other Modules?

This module generates reports based on modules that create CDR entries

How Do I Get to the CDR Reports Module?

- Log in to the FreePBX UI.
- On the top menu click **Reports**
- In the drop down click **CDR Reports**

Usage
