

Software SBC

Sangoma software SBC is distributed as self contained installable ISO. It can be installed on any hardware platform or a Virtual Machine.

Virtualization

Sangoma supports all virtualization platforms

- Vmware
- XenServer
- VirtualBox
- Hyper-V

Requirements

Minimum VM Requirements are

- 1 GIG memory
- 1 CPU
- Bridged Network Device

Virtualization Licensing

In order to simplify software licensing, Sangoma SBC's license binds to VM ethernet Mac address.

This allows the VM to be deployed in VM HA mode without the need for internet access or complicated licensing servers.
