

PIN Set Pro

THIS WIKI HAS BEEN UPDATED FOR VERSION 13 OF YOUR PBX GUI

Note

This wiki is for the **Pro** version of the Pin Sets module. For the standard version, see [Pin Sets](#).

Commercial Module

Sales Slick ▾

Pin Set Pro is an add-on that provides greater flexibility in the deployment of security PIN codes. It allows system administrators to assign PIN codes directly to extensions and granularly control which outbound routes can be dialed without a PIN code.

Whether you are part of a large company looking to bill the cost of calls to internal cost centers, or part of a smaller business looking to recoup the cost of client calls and billable time, Pin Set Pro offers the reporting tools you need.

Pin Set Pro gives you access to an exportable call detail report and billable hours summary. This information is simple to generate and can be exported to your favorite spreadsheet application.

New Settings in the Extensions Module

- Associate PIN codes directly with extensions
- Granularly control which outbound routes each extension is allowed to dial without a PIN, and which routes require a PIN

— Pinless Dialing

E911-Leave-First ?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Local ?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Long Distance ?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
International ?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No

New Report: "Pinsets Code Report"

Generate downloadable reports that include:

- Call Details: Date/time, account code, source, destination, duration, and billable time
- Billable Hours Summary
- Filter by date range, duration, account code, source and destination DID
