

# Activating or Update XactView license

- XactView application has its own license system that is handled through the XactView module since it is a 3rd party software resold by Sangoma for our customers.
- After making a purchase for XactView and getting confirmation the order has been processed you will need to login to your [Sangoma Portal](#) and locate the license key for your XactView purchase.
- Click on the Products > PBX > List option

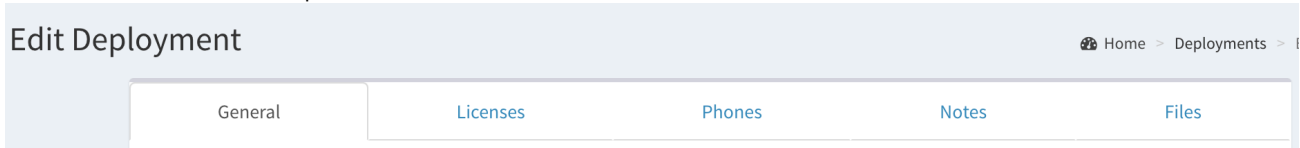

- In the search bar type in the deployment ID or location name you made the purchase for

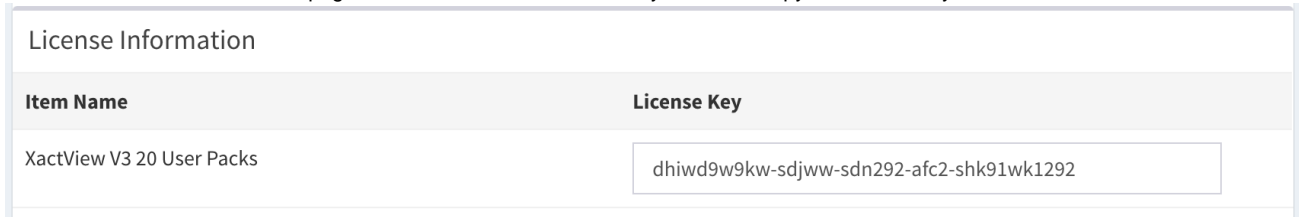

- Click on the Edit/View icon for the deployment you want to view

- Click on the license tab at the top

- Scroll down to the bottom of the page and locate the XactView V3 key code and copy the license key code

- Login to your PBX GUI now and navigate to the XactViewV3 Admin module
