

Module Installation

- The Vega Gateway Module is already pre-installed on FreePBX and PBXact 14 and above and requires no installation.
- If you have FreePBX / PBXact 13 you will be required to upgrade to 14. To identify your system version please reference [System Admin - Updates](#)
- If you have FreePBX/PBXact 14 and do not see the Vega Management Module within the WebGUI, you will simply need to download the Module (which is not available on FreePBX/PBXact 13)
 - To download the Module: [Vega Gateway Module Installation](#)

FreePBX Systems (version 13 and below)

- You must upgrade to FreePBX 14 to obtain the PBX Vega Gateway Module.
 - Follow [Upgrading from FreePBX 10.13.66 to SNG7](#) instructions for more information.

PBXact Systems (version 13.XX and below)

- You must upgrade to FreePBX 14 to obtain the PBX Vega Gateway Module.
 - To update PBXact systems please follow [Upgrade Your PBXact Version 10.13.66 or older](#)
