

JCT Software Update - Sangoma System Release 6.1 Linux Service Update 353

The Sangoma System Release 6.1 Linux Service Update is the vehicle for delivering software fixes for reported software issues. Service Updates deliver cumulative fixes, tested to work together.

Note: Service Update 353 onward are exclusive for the JCT (a.k.a. Springware) board technology, thus cumulative fixes are only applicable to this product line. Compact PCI form factor is also no longer available.
