

Parking-Obihai 1022

Important

Phone Apps are designed to work only with Sangoma IP Phones. Please see our End of Sale notice [here](#) on Phone Apps with 3rd Party Phones.

- Viewing and Retrieving Parked Calls
- Parking a Caller into your Default Lot (Not Supported on All Devices)
- Visual Notifications

Viewing and Retrieving Parked Calls

- Find the **Parking** button on your device and press **Select**. Pressing the **Parking** button while not on a call will display a list of parked calls.

- Here you can see the caller ID of the person parked and how long they have been parked. You can pick up any parked call by using the up/down arrow keys and pressing **Dial**. You can also refresh the list of parked callers by pressing the **Refresh** button.

Parking a Caller into your Default Lot (Not Supported on All Devices)

- While on an active call, you can press the **Park** button to park the caller. The caller will be parked into the default parking lot for your user.

Visual Notifications

- For phones that support a BLF light with the button, the Park button will turn red, informing you someone is waiting in a parking slot in one of the lots that you have permissions to monitor.
