

Zulu UC Home

What is Zulu UC?

Zulu UC Desktop Integration unifies the most popular business communication tools & applications all on your computer screen, enhancing staff and user productivity.

Designed specifically for *FreePBX* and *PBXact* phone systems, Zulu UC enables features such as:

- **Soft Phone**
 - Make & receive phone calls from your desktop/laptop, creating a true 'take-your-office-with-you' experience.
- **Chat**
 - Business chat with : group chat rooms and individual private chat
- **Contacts**
 - Search a colleague and dial, never have to remember an extension
- **Screen Popup**
 - Use custom urls to integrate with third party CRMs and help desk software.
- **Click-to-call**
 - Make calls directly from your
 - Web browser
 - Supported on *FireFox* and *Chrome* Web Browsers
 - Email client
 - Microsoft Office and Outlook
- **SMS & Faxing**
 - Send and receive SMS* and FAX directly from the Zulu plugin and softphone.

Zulu UC is released and supported for the following platforms: Microsoft, MacOS, Linux/RedHat, please refer to the [compatibility chart](#).

Zulu UC is included as part of the PBXact UC Phone Systems.
